ANIMALS IN GOOD CONDITION	No ***	Silver is limping and horses hooves need to be trimmed
VETERINARY PROBLEMS / HEALTH CO	Yes ***	Silver is limping and horses hooves need to be trimmed
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: Elani and i,Hugh arrived at the property. We saw the horses from the side of the road and i noticed one of them was not putting pressure on his foot.

We called them and they walked towards us. We looked around and could see no water. We proceeded to look for the owners and following the road we saw some automatic water dispensers. We were unsure whether the horses could get to the water .

We eventually found the owners son and he allowed us access. We enquired about the horses and explained to him the situation. He mentioned that the hooves haven't been trimmed for a while but the injury has got to be a new one. He requested we wait until his parents come as they are 15 minutes away and we did so.

His father George came and we explained to him the nature of the complaint. He explained that the horses have a dam in the area and an automatic water dispenser.

He also explained that the hooves haven't been trimmed because their farrier cannot catch the horses in order to trim their hooves. We explained that he should try other options and he understood. We also explained to him that Silver might have an injury but it's better for him to have it checked out in case the horse is in pain.

Elani then issued warning 208 to:

- Provide both horses and mule with a farrier and provide proof thereof within 7 days.
- Ensure to have Silver checked out by a veterinarian as it seems like his left hind leg might be injured within 7 days.

To follow up on Monday.

ACTIONS

Warning Issued	208
