Comments:	I contacted the complainant from chain who gave me Konrads contact details. Chain and conrad said that the ostrich cannot stand and has been in the same spot since yesterday. I asked whether they know anyone who can shoot the ostrich but they said they didnt. I then explained the possibility of euthanasia if the ostrich cannot walk. I then drove out towards the farm who still have tenants. I arrived at the property by the ostrich. I gent close to the ostrich and touched it, when it stood up and walked away. Nothing was wrong with it. The tenant named Raimero came out and told me that they all know the ostrich and that it is extremely tame and nothing is wrong with it.
