General Report Comments: Hugh and I, Elani arrived at the petshop for the follow up inspection for the warning issued for the birds.

Gerhard said we can go through and have a look. The new feeders for the birds that he is using works very well with the doves and canaries. The cages were much cleaner than the previous visit. He added perches in the cages so that the birds have enough space to perch. He did start to add parrot pellets to the food of his parrot-type birds to slowly integrate them into a healthier diet.

The ringneck doves were not seperated for more space and some of the bird cages did not have environmental enrichment.

I asked him to immediately seperate the doves in half so that there are maximum 4 per cage and add environmental enrichment to all the bird cages.

He first seperated the Ringneck doves into two different bird cages .

He then fetched hanging toys and mineral blocks and added it to the cages that did not have any environmental enrichment.

The owner complied with my previous warning. Feedback was given to the complainant via email.

This case will be closed and routine inspections will be done regularly to ensure the wellbeing of animals kept at the petshop.

To follow up internally within a month
