VETERINARY REPORT:

26 March 2025

To whom it may concerned.

Client: Mrs. M. Goodwin

Patient: Barnes

The horse called Barnes was consulted by me on 24 March 2025.
The horse is very old with few teeth left. It is still eating well.

It has a condition score of 1.5, which is low but considering the age and teeth the horse is still doing fairly well.

The horse has a lameness in the right hind leg due to hip problem, possibly arthritis.
Pain medication was given.

A timeline was set between me and the owner of the horse.
If the lameness does not get better within 5 days, prognosis will be reconsidered.

It was decided that we will not let the horse go through another cold winter and that euthanasia will be performed before the cold winter weather sets in.

At this point in time Barnes does not look distressed and to my opinion it is fair to give the horse and owner some time and space for a final farewell. I can also confirm that the owner is spending time and effort to make Barnes life as comfortable as possible.
