VETERINARY PROBLEMS / HEALTH CO	Yes ***	Skin condition
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: Elani and I,Hugh arrived at the property and was greeted by one of the kids in the neighborhood. We then explained to him that we were looking for two aggressive pitbulls which was apparently not in good condition.

He then called his friend and he approached us. We then explained to him what the nature of the complaint was and he allowed us access. We entered the property and we could see the front yard was full of faeces and we then explained to Reagen that he had to clean the yard as it was months of faeces around the plants aswell as plastic bottles and glass. His sister then came outside from the house and explained that the dogs live in the back area and do not live in the front. Elani then explained that they are currently in the front and she understood. I then explained to him that he had to clean as we could see that one of the dogs had a skin condition maybe due to ticks and fleas or the environment. He then agreed.

We could then see in the back area was a large kennel aswell as a big bowl of water .The environment In the back was also fairly cleaner than the front. We then explained to Reagen that he should visit our mobile clinic and get some nexguard which he then agreed to.

Elani then issued Warning 068 to:

- Your yard is full of excess faeces and hazardous material that can cause injury and disease. Ensure to clean the yard properly as discussed within 7 days.
- Provide killer with veterinary treatment for his skin condition within 48 hours.

To follow up tomorrow and see if he visits the mobile clinic .

ACTIONS

Warning Issued	068
