ADEQUATE SPACE AVAILABLE	Yes	
CLEAN LIVING ENVIRONMENT	Yes	
ANIMALS IN GOOD CONDITION	Yes	
VETERINARY PROBLEMS / HEALTH CO	Yes ***	Barnes still emaciated but slowly gaining weight
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: Elani and I, Hugh arrived at the property. As we drove in we could see Barnes in the distance and he looked like he gained some weight. We then went closer and we saw one of the caretakers. We then greeted her and she mentioned that Nic and Miriam will be here soon. We then thanked her and waited on them.

Nic and Miriam then eventually arrived and we greeted them. We then explained that we were there to do the follow up to see if Barnes was any better. They then agreed and they brought Sam as well as Barnes to us so we could inspect them. Sam was in good condition and eating well, Barnes was a bit difficult as we had to compare the former photos taken of Barnes to how he looks presently. We could then see that Barnes was gaining weight slowly which was a bit of a good sign. They then also mentioned that they will put Barnes down before the winter or immediately if medication was not working. Elani then asked whether the doctor had done a follow up after the 5 days to see whether the medication is working. They then replied no but they would be willing to get him out as soon as they can to do another vet report if needed.

Elani then mentioned that preferably they should do that so that we could know whether the medication is working. They then agreed. Overall we could see Barnes was looking slightly better and he was eating well.

To follow up in a week to request the vet report.
