General Report Comments: I arrived at the property and saw one of the dogs in front. Ilze came out to greet me. I asked her for updates about their dogs and situation. She told me two of the adult dogs died and was hit by cars. They only have a male and female dog left. She also said the female had puppies recently and she doesn't know if they want to keep them.

I went to the back yard with her and saw the other tan male dog. He was lying on an old mattress and looks quite old. The yard looks exactly the same with overgrown vegetation and hazardous material. They still have a pillow under the braai for the dogs to sleep on. It was dirty so I reeducated her on why they need to keep the area clean. I also educated again about our mobile clinic that provides dip and sells everything they need. This time she really seemed interested and asked questions. When I asked when they can fix things, she mentioned after payday which is in quite a while for them.

I issued a FINAL warning to:

- 1) Clean the dogs living environment from hazardous material within 21 days and keep the grass short to prevent parasitic conditions.
- 2) Provide Nexguard/ Bravecto for Sia and Skyler within 21 days.

Ilze signed the warning and claimed only Silka is working. I also explained that I can remove all the dogs if they don't comply and she understood.

To follow up in 21 days.
