ANIMALS IN GOOD CONDITION	No ***	Infected septic bite wound
VETERINARY PROBLEMS / HEALTH CO	Yes ***	Infected septic bite wound
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: Neighbours assisted me in finding the correct address which was 32 April Avenue, Wellington. I, Elani arrived at the property and met with the three kids who were home. One of the daughters were 19 years old.

I asked them to show me the dog who was lying in the kennel. They called him and when he came out I could smell the infection strongly. The wound was infected, pussy and black. When asked when it happened, they claimed it happened about a month ago. I asked them to call their parents so I can speak with them. The younger daughter called her dad. I explained to him that the dog needs to go to the veterinarian or they must surrender the dog to me. I also told him that this would've been easily prevented if they called me when it happened for advice. He then agreed to surrender the dog.

As I got the paperwork, his wife, Venessa came home. I explained the situation to her and she understood. The kids cried. I then gave her our information pamphlet for future reference. She was grateful for this and signed Milky over.
