ADEQUATE SPACE AVAILABLE	Yes	
CLEAN LIVING ENVIRONMENT	No ***	Swimming pond is dirty
VETERINARY PROBLEMS / HEALTH CO	No	
ANIMALS IN GOOD CONDITION	Yes	
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: Jeanette and I, Elani arrived At the property and went to where the fowl are kept.

I could see since last time we were here that they have maintained keeping hazardous material away from where the animals are kept.

They also confined the geese to the parking lot and 2 specific camps.

There are two dams available for the geese to swim in of which post were dirty and needed to be cleaned with new water.

We then went inside to speak to Karen. I asked her again to show me the food for the birds, which there was available. She then also mentioned that the one sheep and cattle do get lucerne bales from their neighbouring farm across the road called Oude Pont Plaas.

She also mentioned that they appiinted a permanent caretaker for the birds called Peter Dawsin who feeds them and cleans.

When mentioning the cleanliness of the ponds, she mentioned that they do it weekly but with the heat and amount of birds it gets dirty very quickly.

She mentioned Dimitri is sick but that he has a daughter that comes to help at Florida Padstal as well. This was good to know that someone else is responsible at this facility as I have never met Dimitri.

I issued a warning to:

1) It was observed that the swimming ponds for the birds are non potable and has excess faeces and algae. Ensure to vlean the two ponds properly within 7 days.

To follow up next week.

ACTIONS

Warning Issued	108
