Comments:	I went to the premises and called from the outside.The elderly woman came outside and mentioned that nobody was home but she had gone to the Vet.I went to WAHG and they had confirmed that she was there.They explained to me that i could possibly be blood on the brain which could possibly get better over time and they asked that i go check on the dog within 6 months to see if theres any improvement.I tried calling the owner in order to inform her of what the doctor said but could not get through to her. To follow up in 6months.
