PSIRA Registration (6 or 7 Digit number) and date _____

TRAINING AND HANDLING

In accordance with the Private Security Regulatory Authority Act, training may only be undertaken by a specified, accredited number of operations. This relates to the training of dogs and the training of handlers.

Confirmation of registration of each handler with the Private Security Industry Regulatory Authority(PSIRA)

Requested paperwork

Does the company train dogs? Yes

If 'Yes' confirmation of PSIRA accreditation Await paperwork

Name of trainer Nico van der Merwe then send to George to be finished

GENERAL MANAGEMENT

Is a record/history for each dog accessible? no

What breeds are used? GSD, Pitbull, Border Collie, Cross breed such as Boerboel etc

Are the dogs suited to the type of work they do (training, breed, age, health etc) _____

IDENTIFICATION

Method of identification Microshipping according to manager

WORK DETAILS

Duty roster (including rest periods) for each dog yes

Lengths of contracted shifts 8 to 12 hours

Travelling time 30 min to 45 depends on traffic

Travelling conditions (terrain etc) mainly tar road

Do dogs work with the same handlers on each shift? no

HEALTH MANAGEMENT

It is important to confirm with company vet if a sick/injured dog has been assessed and treated.

Does each dog have a veterinary record? await documentation

Vaccination record available, including rabies? no but requested

Name and contact number of person responsible for ensuring dogs receive veterinary treatment when necessary?

Nico van der Merwe

Details of dipping programme? No programme on paper

Person responsible for dipping? Nico gives instruction to staff

Location of dip bath? Inside area where food are prepared this is a question mark

Where are sick/injured dogs kept? depend on severity at vets or on site

Is a quarantine area used for new arrivals? none observed

Details of sick/injured dogs observed? all in warning detailed

Acceptable treatment being given? warned to get medical treatment

General condition of dogs (Weight, coats, nails etc) overall good one dog with long nails observed

KENNELS

Kennel attendant duty details Always a staff member on site

Description of kennels Asbestos, bricks and wire

Individual or shared kennels? Both

Size of kennel with single dog? 3 x 4 approximately and area of about 6 x 10 m for some

Size of kennel with more than one dog? 3m x 4 m

Describe maintenance concerns Asbestos, loose wire and prudent smell of ammonia

Was any fence fighting observed? none

Other observations one scared dog

HYGIENE

Are kennels and exercise runs clean? _____

Cleaning product used? Black dip and Pine Gel

Sterilised agent used and frequency? Only Those above mentioned used

Are dogs removed from kennels during cleaning? Warning issued for concern

What measures are in place to control flies & rodents? Warning issued for Rattex used

FOOD & WATER

Working dogs need good quality food. Some companies do not provide food before or during shifts.

Person responsible for feeding dogs Staff member on duty

How often are dogs fed? Daily

Quantity of food According to size and age

Brands used _____

Appropriate foods for special needs? yes

General hygiene of food store? fair

Do all dogs have fresh, clean water? yes

EQUIPMENT

Recommend the use of half-check or mesh control/slip collars, instead of the full metal version. The metal chains have a high potential of damaging a dog if not used correctly. Whether metal or mesh, it is essential that the collars are well maintained and "slip" properly so as not to choke or damage the dog.

What equipment is used? not observed

Is it well maintained? _____

Are control chains left on dogs when not working? none observed

Are control chains used properly? not observed

EXERCISE & ENRICHMENT

This MUST be provided for all dogs, whether they are currently working or not. Dogs are trained differently and appropriate enrichment for one dog may be different for another.

	Working dogs	Non-working dogs (breeding, retired, unwanted, sick, handler sick etc)
Daily exercise time	unsure as owner says yes ?	
Other time out of kennel	unsure as owner says daily ?	
Toys and chew toys	none	
Companionship	not all	
Human contact	staff and handler only	

Size and description of exercise runs not big enough currently 5m x 8m approximately

Is there shelter and fresh water in exercise runs? water observed not shelter

What is the maximum time spent in kennels? _____

What happens when a dog's regular handler is away? another handler takes over

Were any of the following observed:

Stereotypical behaviour (pacing, tail chasing, excessive barking) no

Excessive grooming/paw licking no

Other behavioural issues Just one dog that appeared scared

REST DETAILS

It is important that working dogs have appropriate resting areas. Kennel rotation ("hot kennelling" dogs working different shifts sharing the same kennel) is not conducive to this due to scent mixing.

Details of sleeping areas and bedding _____

Do they rotate kennels (one dog occupying the kennel at night and another dog using the same kennel during the day)? _____

BREEDING

If a company breeds its own dogs, a separate inspection needs to be conducted on those facilities and should be done before providing recommendations (unless urgent problems exist). If it purchases from breeders, obtain the details so an inspection can be carried out at a later stage.

From where or are the dogs obtained? Owner call them so caalled Rscues...from public mostly

If they breed their own dogs, where? (conduct an inspection there as well) _____

unsure but might be a suspicion

Are dogs registered? With whom? _____

Medical records for breeding dogs? _____

Do records show that breeding dogs are free of hereditary conditions (Hip Dysplasia etc) _____

Are dogs medically fit to work? _____

Do bitches have an area to voluntarily rest away from puppies? _____

RETIRED OR UNWANTED DOGS

It is important that dogs that are not working are kept stimulated and free from boredom or kennel stress. Where rehoming is done, recommendations can be made on the process, based on SPCA standards. Where rehoming does not happen, work with the company to sign over to the SPCA.

What does the company do with these dogs? Says PTS

Where are they kept? On site

If they rehome, is a rehoming policy in place? Paper work to be requested

Does the rehoming policy stipulate that dog cannot be chained? _____

Are all dogs sterilised before rehoming? _____

Are Pre and Post home checks undertaken? _____

TRANSPORTATION

Method of transport Trailors

Maximum length of time dogs confined in transport not observed says about 40 min

Are dogs muzzled during transport? no

General roadworthiness of vehicles good

Are the transport cages/trailers clean? yes

Are the doors secured to prevent escape or theft? yes

Do the dogs have enough space to stand, turn and lie down? yes

Are non-slip materials available on the trailer floor? warning issued to replace

Is ventilation suitable? yes

Is there potential for exhaust fumes entering the dog(s) space? no
