Subject: Concerning Facebook post on community group -Boksburg

Good day,

I would like to bring the following screen shot to your attention of a post made on a Boksburg community group on Facebook.

The person mentions a list of welfare concerns with regard to his snake.

I understand it may be difficult to action this complaint as thier is no physical address for this person however I do feel something should be done.

Hi everyone,

I don't know if there are any experts or someone that has knowledge of snakes. We have two corn snakes, one still a bit little and then a mature one. The problem comes in with the mature one, he does not want to

eat. He hasn't eaten in over two months and everytime we by him a rat we have to let it go or it dies in the cage.

What can be the cause or reason ? His cage is in a quiet restful place and the temperate is accordingly without severe or frequent disturbances. Any advise will help 🙏
