Facility TEARS SURRENDER
4 Lekkerwater Road
Sunnydale
7975

History: Surrendered by owners, found in his cage not on a chain but his collar tight around his neck.

20 Jul 2021 11:09:51

Physical exam:

T: 37,4, mm pale pink, crt 2sec, normal heart sounds, normal lung sounds, severely emaciated, superficial lymph nodes moderately enlarged and firm, coat: severely matted with dirt and faeces, severe soiling around perineal area, maggots all around where collar was which caused a hotspot all around neck, purulent vaginal discharge, blood smear pending,

Assess: .

Severe neglect on owners part, emaciation, vaginal discharge: possible open pyometra, possible biliary/ehrlichia-pending blood smear,

Tx: sedate: 1ml/10kg ACP/morphine,

propofol induction, intubated 7mm cuffed et tube,

maint on isoflurane/oxygen, placed on intra operative fluids at 2ml/kg/hr

Shave and groom most of mats that we were able to remove, also washed and removed most faeces off fur.

Plan: monitor recovery of dog and treat concurrent conditions to stabilize dog for spay with possible pyometra.
