Comments, if any:

The living area of the dogs are littered with rubble and wood. I wrote a warning for them to clean the area by Monday and also to place the water bowl inside a Tyre or a rock inside the Tyre. They are not allowed to walk their dogs. I gave advice on getting hooves for the dog to keep them busy. Both dogs are sterilized.

The neighboring dog is on a static chain and sterilized but jumps the walls. The chain reaches the entire area without obstruction and she can reach her water and shelter. It's safer for the dog this way. If the dogs get out they get fined.
