EXAMINATION FINDINGS

On clinical examination, the animal was found to be of extremely low body condition score (BCS), with a score of 1-1.5/5, normal being 2.5-3/5. The dog was also found to be mildly dehydrated, with pale pink mucous membranes and a prolonged skin tent.

COMMENTS

In my professional opinion, this animal was not being adequately cared for, as evident by the emaciated state he was presented in and the multiple bite wound scars.

Yours sincerely
