

VETERINARY REPORT

To whom it may concern

Please find below the veterinary report for Admission number 36087, surrendered by Darren from 15 John Street Kuilsriver on 5 of January 2022.

ANIMAL DETAILS

Species: Canine

Breed: X Breed

Sex: Female, intact

Age: Puppy

Name: -

Description: Black and Tan, white patch present on chest

EXAMINATION FINDINGS

Upon examination, the puppy was in good body condition. The puppy had pale pink mucus membranes and had a mild skin tent. The puppy was bright, alert and responsive. Fleas were noted on the lumbosacral area of the dog. Ticks were present throughout the body of the dog.

COMMENTS

The dog was treated for ticks and fleas for frontline. A course of Doxycycline, and once of Cerenia and Kyro B was administered as Ehrlichiosis (tick bite fever) was suspected.

The dog has responded well to treatment.

Yours sincerely

**Dr Rivona Ramnanan (BSc Zoology; BSc (Hons) Wildlife Management; BVSc)
