

Good day...can you assist please?

One of my neighbors has a small puppy/puppies that have been outside in this awful heat since Christmas. I've tried looking, but as the puppy/s are at the back I cannot see, but hear the crying day & night!

I don't know if any of his other dogs had puppies (I know he bred in the past)

When I've approached this guy in the past re his treatment of dogs (going away in Feb and someone coming on the odd occasion to feed & give water), he had the police IN my house for invading his privacy as I fed them over the wall, so I am not eager to talk to him again.

The dogs are kept at the back, so you'll not be able to see much from the front gate.
