To whom it may concern

Charlotte Moore is a 7-year-old pig that has been a patient of CEAH (Cape Exotic Animal Hospital) since 28/08/2021.

We saw her for a health check on the 20/01/2022 for very scaly skin – all her clinical parameters were within normal limits except for the dry skin. A skin scraping was done and S. Scabiei was detected – we started her on an ivermectin anti-parasitic treatment for a week where she came for a follow up today. The infection has cleared up, she is seen as clinically healthy on the day of examination today.

She is also clear of external parasites.

She also has arthritis which she is being treated for chronically.

Let me know if you have any more questions.

Kind regards

Dr. Ilse Jenkinson
