

VETERINARY REPORT

To whom it may concern

On the 18th of January 2023, Inspector Werner Taljaard confiscated a dog from Honeysuckle street, Lentegeur.

ANIMAL DETAILS

Species: Canine
Breed: Pitbull
Sex: Female, unsterilized
Age: Adult
Name: Sky
Description: Tan
Admission Number: 89918

EXAMINATION FINDINGS

On examination of the dog, the clinical parameters were within normal limits.

Temperature: 37.5 °C

Pulse: 84 beats per minute

Respiration: 20 breaths per minute

The gums were slightly pale.

Blood smear: mild anaemia.

Presence of excessive fleas throughout the body.

According to the Nestle Purina Body Condition System: Body condition score is body condition score of 2.

COMMENTS

The anaemia noted on the blood smear is most likely related to the excessive presence of fleas, as fleas drink blood.

The poor body condition score and presence of fleas indicates that this dog was neglected and in my professional opinion did not receive adequate basic care.

Dr Rivona Ramnanan (BVSc)
Veterinarian
