Comment:
Were Animals Seen on the Property: Yes

CHECKLISTS

WATER AVAILABLE	Yes
ADEQUATE SHELTER AVAILABLE	Yes
ADEQUATE SPACE AVAILABLE	Yes
CLEAN LIVING ENVIRONMENT	Yes
ANIMALS IN GOOD CONDITION	Yes
CONFINEMENT OF ANIMALS	Free roaming - in property
VETERINARY PROBLEMS / HEALTH CO	Yes *** Dog with skin condition, under treatment and showing some improvement

General Report Comments: I arrived at the property and met the owner Amanda at home. I explained the reason for my visit and she got upset. She wanted to know what was wrong this time. She was under the impression that I was investigating a new complaint. I told her that I am doing a follow up on the last inspection and I would like to examine the living conditions of the animals at the premises. She allowed me to come in and showed me her dogs. I observed 3 dogs, a dachi cross, a maltese cross and a staffie cross type dog. The Staffie type had some sort of skin problem on the back and the tail. Amanda told me that she applies cortisone cream, but the dog bites and licks the affected area. She has put on a cone, but the dog destroyed it apparently.

I asked about the dog with puppies, and Amanda told me that the German Shepherd belongs to another person sharing the house. A lady named Tara van Rensburg came to me and asked me what I want to see about the dog. I told her the same, that I need to check the living conditions of all her animals. Tara told me that she owns 3 dogs and 1 snake. I observed 1 gsd type female dog with 6 puppies. I also observed 1 adult female albino corn snake. Tara stated that the other 2 dogs belong to her daughter, and 3 snakes and a gecko. The 2 dogs belonging to Tara's daughter is a cocker spaniel and a male ghd. I also observed 2 baby corn snakes and 1 adult corn snake in the room of Tara's daughter. They showed me packed frozen mice, which they feed to the snakes. They apparently buy frozen mice from a pet shop. Two of Tara's dogs and the two belonging to her daughter live in the backyard and are free roaming with access to adequate shelter and water.

All the dogs appeared to be in good condition. There is some improvement on the Staffie type dog's skin problem. I will have to do another recheck to see if there is more improvement.

The reptiles appeared to be in good body condition. They have suitable-sized tanks with enrichment. Heat pads are available and water is seen in the tanks. I arranged to do a steri assist for 2 dogs and a cat. I will schedule this for the new year because we have a huge backlog of cases that we have to attend to still.

For extra info: Tara apparently has an NPO animal welfare organization. She showed me the NPO registration certificate that she obtained in 2014.

Follow up in two weeks to check on the skin condition of 1 dog.

CHECKLISTS

WATER AVAILABLE	Yes
ADEQUATE SHELTER AVAILABLE	Yes
ADEQUATE SPACE AVAILABLE	Yes
CLEAN LIVING ENVIRONMENT	Yes
ANIMALS IN GOOD CONDITION	Yes
CONFINEMENT OF ANIMALS	Free roaming - in property
VETERINARY PROBLEMS / HEALTH CONCERNS	Yes Dog with skin condition, under treatment and showing some improvement

General Report Comments: Upon my arrival, I met with Tara. I conducted a full inspection and the same animals are still present on the property and the conditions are the same. However, the dog with the skin condition appeared to be improving since the hair is starting to grow back.

Tara told me that I do not need to take the 2 dogs for sterilisation as she has already made a booking elsewhere for the dogs to be sterilised in next month.

A follow-up can be done after a month to check the dog with the skin condition.
