Dear Inspector

Mazikeen, owned by Mr Phillip Venter was seen by me on 23/01 /2023 and again on 30/01/2023. On 23/01 her blood glucose was still not controlled, her weight had improved from the previous visit but she was still underweight. Her insulin dose was adjusted and she returned for a glucose curve on 30/01/2023. Her blood glucose was well controlled and she had gained weight. I am happy with her current treatment and although she is still slightly underweight, I expect her weight to normalise now that her blood sugar is well controlled. I have advised Mr Venter that he can bring her for a weight check again in 1 month.

Thank you for the wonderful work that you do.  
Kind regards

Lynn
