RE:

Max

Male

Feline

DOB: 2017

Max came in on 22/02/2023 for a consult, first time seeing the cat.

6year old – nothing has changed

Came in for a health check

He has shown these symptoms since his birth.

Potential diagnoses include Cerebellar hypoplasia and trauma

During his physical exam:

- Temperature: 38,3
- Not painful
- Head tremors and head bobs present
- Severe ataxia – non-progressive
- Otherwise healthy

Kind regards

Dr S Robinson
