VETERINARY HEALTH REPORT

PATIENT DETAILS

Name: Kratos
Species: Canine
Breed: American Pit Bull Terrier
Age: 5 years
Sex: Neutered Male
Colour: Brown

OWNER DETAILS

Name: Mr Jibran Van Nelson
Address: 3 Hawthorne Close, Faerie Knowe
Sunny Dale, 7975
Home: -
Cell: 062-442-4908

I, the undersigned, have examined the **Canine** detailed above and submit the following findings.
Reason: Referred by the SPCA for an examination – under weight.

Current weight: 21kg

Clinical exam: Clinically healthy
Habitus 4+ BAR, friendly and not scared.
Coat dirty but condition good.
No external parasites found.
No wounds or injuries found.
Teeth in good condition, oral exam normal.

The following abnormalities were identified:

Underweight. Good musculature generally but poorly muscled over spine and shoulders.
Very low fat deposition.
Currently 21kg and should be closer to 25-26kg.
Have discussed feeding with owners, currently on Montego pelleted diet. Have advised feeding Montego puppy food with increased protein and energy to increase his weight to 25kg.
To recheck in 1 month and record his weight.

Treatment: Dewormed today and need to repeat every 3-4 months.

Veterinarian: Dr Brad Mulder BSc BVSc
