In light of our recent inspection conducted on 12 April 2023 we advise that the below are rectified and/or implemented without unnecessary delay.

1. As discussed Rattex can't be used for pest control purposes due to the unnecessary suffering it causes to animals, as well as possibly causing secondary poisoning, **ensure to discontinue with immediate effect;**
 - a. Humane deterrents must be implemented and utilised for the control of pest, refer to the attached document for humane/alternative humane deterrents regarding pest control.
2. The area around the 'Outside Stable' section was riddled and infested with flies;
 - a. As discussed, a product named "Agita Paint" can be utilised as a deterrent, alternatively suitable fly control must be implemented and continuous use must be ensured.
3. Old baths were observed being used in the paddocks for water, some of the baths had a build-up of algae inside;
 - a. It is advised to rather discontinue the use of these old baths and rather replace them with the large green buckets (as already did in some paddocks), these will also be easier to clean and maintain a clean condition;
