The following was observed and must be rectified within 7 days unless stated otherwise:

1. Upon inspection, it was noted that shavings were used as bedding for the birds. The birds do scatter it into their water and food bowls, making it non-potable. I suggest placing the food bowls and water bowls higher in the enclosures to prevent the previous from happening. It was also observed that one of the budgie enclosures was overstocked as there was not enough perching space for the birds. Ensure to include enough perches in all the bird enclosures as discussed or split them into other open enclosures.
2. One canary was observed dead in the cage kept with other canaries. Ensure to have someone checking the animals regularly **at all times** as the person responsible for the birds was off today.
