EXAMINATION FINDINGS

On examination, the dog was not weight bearing on the right front leg. The dog was in pain and had to be sedated for a radiograph of the affected leg. There was a swelling noted on the affected front limb.

Based on the X-ray, there was a mid-diaphyseal complete fracture of the radius and ulna of the right front leg.

According to Nestlé PURINA Body Condition System, this dogs body condition score was 3.5/9. The dog also had presence of fleas.

COMMENTS

Fractures are extremely painful. The dog was humanely euthanised to prevent further suffering.
