

VETERINARY REPORT

To: Whom it may concern

On 10 July 2023, Inspector Jeffery Mfini from the Cape of Good Hope SPCA, presented this dog for examination. The dog was surrendered by Lauren van Wyk.

ANIMAL DETAILS

Species: Canine
Breed: Pitbull
Sex: Male
Age: Adult
Name: Don
Description: Brown
Admission number: 098759

EXAMINATION FINDINGS

According to Nestlé PURINA Body Condition System, this dogs body condition score was 1/9. The dog also had presence of ticks on the body.

There was a mass under the neck noted.

The testicles of the dog were severely enlarged.

COMMENTS

In my opinion the dog was severely underweight. A fine needle aspirate was done on the testicles. The findings were indicative of cancer. This could have attributed to its poor body condition. However, there is a degree of neglect noted due to the dogs state of severe malnutrition.

Yours sincerely
