VETERINARY REPORT:

Golden Hazel, a chestnut gelding was examined on 25/07/2023.

On clinical examination he is healthy.

His left eye had a traumatic injury before he was rescued. This eye is in good condition and maintained well with topical cleaning and medication, there is no sign of infection in the eye socket.

His temperature, gut sounds and heart rate was normal, his teeth are in good condition and is done by an equine dentist regularly. The other eye is normal.

His body condition score is 2/5. His coat is shiny. He has a healthy appetite. He is on a deworming schedule. He receives supplementary feeding. He is in a herd that does not bully him. I believe with time his body condition will improve, for now he is taken care of well.

If you have any further questions, please contact me.

Kind regards

Dr Zandri Snyman
