To whom it may concern

Re: SPCA Warning No. 17964 issued 24 August 2023

In response to the clauses stated in the warning issued to Mr Kendre Allies, I, Dr Lauren Brewis (Registration Number D08/6177), can confirm that I am the regular vet for all the horses on the Oude Molen property.

I have been the vet for Mr Allies since 2014. During this time, Mr Allies has always taken excellent care of all the horses on the property. They get regular vaccinations, deworming and dentals. They are in good condition and their hooves are trimmed regularly. The mud in winter has always been an issue in the herd paddock and surprisingly, I have never had a case of mud fever in any of the horses. The horses are turned out regularly and allowed to graze and socialise.

Point 1:

Blitz is owned privately by one of Mr Allies' clients. He sustained a tendon injury to the left front leg in December of 2020. He was treated and rehabilitated but unfortunately, he developed adhesions, and the tendon became contracted on that leg. I monitor his comfort levels regularly and am in contact with the owner if anything should change. I believe that he still has quality of life, and this has been discussed at length with owner.

Point 2:

I attended to Amire/ Amarah today (24 August 2023). She received an oral anti-inflammatory on afternoon of 23 August 2023. I found her to have a swelling of the right hind fetlock. No pain on palpation or any evidence of a wound was found. She is trotting sound and doesn't resist flexion. I suspect a minor strain in the field. She is being placed on restricted paddock space and further anti-inflammatories for 2 weeks. I will keep in touch with Mr Allies regarding her progress.

If there are any further queries or concerns, please don't hesitate to contact me directly.

Kind regards

Dr L Tregoning BVSc D08/6177
