Comments: Dog was taken to Mdzananda clinic and this was received recieved via WhatsApp from respondent:

This is all they gave us.. Says there's nothing wrong with him, took blood and temperature, they say it's fine, we should go back 12May..They gave meds and said we should rather feed him 3times a day in smaller portions and get a supplement/vitamin.

I will come and check up on the dog end of May and see if the body score has improved after these advises recieved from the veterinarian . The owner has complied with previous warning issued
