Subject: Dog in field in CBD

Hello

I saw a rottweiler dog in an empty lot in the CBD which is locked into a small cage - seemingly as a security dog - but it looked to be in a very small space and I couldn't see any water or food and cage is full of faeces. It is boiling hot and the dog must be very uncomfortable. Local security guards told me he has a handler which is another security guard but that the handler is not at the site

Please check. It is opposite the Rockefeller Hotel and Dept of Fishers at this pin
