Reference INSP173892 - Urgent assistance required

Dear Sir / Madam

Trust you are well.

We purchased a house in 4th Avenue, Grassy Park and moved into the house in October 2022. Before my family and I relocated from Jhb to here, I had spent some time at the house doing minor renovations. In that time, I suspect that someone had reported our neighbor to the SPCA as one day, I overheard a conversation between the neighbor and a representative from the SPCA.

Now that we're living here, we've realised that our neighbor does not discard their dogs' faeces and it is left to accumulate. They have 3 big dogs and 1 small dog and the stench is unbearable. We have to use facial masks when we hang our washing. We cannot braai or spend time outside in our yard. We have to keep our windows closed at all times to avoid the terrible smell from entering our house. Furthermore, our house is a double storey and the view from our window upstairs is a sight for saw eyes to say the least. We don't invite people to our home because it's so embarrassing.

I have reported this telephonically to the SPCA in Grassy Park on numerous occasions but nothing has been done to resolve the issue.

On 7th March, I personally went to the SPCA and spoke to the supervisor, Rudy. He advised me to send this email with my complaint together with photos of the neighbor's yard - see attached. You will note that some of the faeces have turned white which proves how long the faeces are left to accumulate. Rudy assured me that the SPCA, Law Enforcement as well as the Health Inspector will get involved to resolve this issue.

Our neighbor's address is 124 4th Avenue, Grassy Park.

Your urgent assistance is appreciated as the situation is unbearable. This is a health hazard and we cannot live under these conditions any longer.

Thank you

Kind Regards
Cedrick
