Follow-Up Date: 2022-10-17

Comments: I collected the juvenile male baboon from NCC's field ranger and admitted it to the WLU. There were no veterinarians available to assess it but it did not display any obvious wounds besides some bruising under its right armpit. It was BaR and should be reunited with his troop by Monday following a vet assessment. Baboon was successfully released back to it's troop at Baskloof, with NCC in attendance.
