Re: Busta a 5 year old male Pitbull terrier owned by Mr Warren Elrick

Busta was examined at Ixia Street Animal Hospital today.
He is in excellent condition physically and clearly well looked after.

He has a lame left frontlimb due to a prior car-related trauma which has resulted in a carpus fixed in flexion and this limb being chronically non weight-bearing. Reportedly at the time of the accident he received care from welfare. He does not appear to experience pain and is able to cope well despite this non-functional forelimb.

In my opinion he is well cared for and in good condition.

Should further information be required, please contact us.

Sincerely,

Dr. M. Sussens (BVSc)
