Comments, if any:

Upon inspection, i met with Karel. There are 2 dogs on the property. The dog in question named Cesar was on a running chain that was of an adequate length while the other dog named Killer was on a static. Karel told me that the dogs can escape the property. Both dogs had access to water and a clean living environment. They had access to adequate shelter. Both dogs appeared in a fair body weight condition but Cesar does appear as if she is getting a skin condition by her tail and back area.

I issued a warning to:
(1)provide Cesar with nextguard within 7 days
(2)place killer on a running chain within 14 days
