General Report Comments: Upon arrival I met owner who gave me access onto property. She told me that they did not take the dog to the vet, but that they googled and was told to deworm the dog whichbis what they did. Looking at the dog in questions weight I could see that he had picked up weight and that he no longer looks like he needed to be taken to the vet. Both dogs now appears to be in fair condition and alert with body scores of 2.5-3/5. They have access to adequate water, shelter and a clean living environment.

The female dog looks like she is pregnant and owner's confirmed that she is. I then offered sterilization and they agreed to sterilize both once female dog is ready.

To follow-up.
