General Report Comments: Upon my arrival at the property I observed 1 of the dogs running loose outside its enclosure without the dog handler insight, I then got hold the security guard to open, I was allowed access.

The guard then ran to the otherside of the property to go and call the dog handler, I met with ntobeko, I checked the dogs in their enclosures, they all have good body condition but 1 dog is in need of grooming, I asked the guard if they groom the dogs and he said yes and then I showed him the 1 dog and he looked surprised, I then inspected the enclosures and there is still a build up of hair and dirt under the conveyer belt mats and under the kennels, the guard told me they don't have a broom to clean as it broke and was not replaced so they have to break off branches from the trees to sweep.

The handler also asked me can't the company raise the middle enclosure as it's stuck in the sand. I observed none of the overgrown grass around the enclosures was cut, no relief camp was put in place, the guard then showed me the water that is nearly finished, 15L of water gets brought to the site of which that water is for the 3 dogs and for the 2 guards on site, no fly traps were observed and the 1 dog's kennel is broken.

3 warnings were issued to Golden Security already and nothing was done to correct any of the concerns pointed out, I'm of the opinion that a warrant should be obtained.
