General Report Comments: Upon my arrival at the property I met with the owner named clive who allowed me access on to the property where I could do my follow-up inspection.

Upon my follow-up inspection I observed the owner fixed the shelter, the pigs are free roaming inside the kraal, the other 2 adult pigs and piglets are in good condition it's only the 1 female pig that is underweight due to giving birth as well as there's is bullying going on with the 1 pig towards the underweight pig but the owner gave the Pig Dectomax and informed me his going to agrimark now to get food to help the pig gain weight again, I advised the owner to feed the underweight pig separately, water, food and shelter is available and the living environment is clean aswell.

I will follow-up in a months time again to check on the pigs weight.
