General Report Comments: Upon my and cadet inspector Tariq arrival at the property we met with a young boy who allowed us access on to the property where we could do our inspection.

Upon our inspection we observed 4 dogs all chained on static chains, all the dogs appear to be underweight, 1 dog in specific appeared to have scars all over it's body, scars on its entire face, down its chest and front legs, mid section, hind area and 2 injuries, 1 on its head and 1 on its ear of which both have blood on, the scard dog teeth also appear to be damaged. No water was available and 2 of the dogs don't have shelter, the living environment is dirty as there is rocks and rubble laying around everywhere where the dogs are chained.

I seized the scard dog.

I also issued a warning: warning number: 21301
