

VETERINARY REPORT

To whom it may concern

On Wednesday, 31 January 2024, at approximately 10h00 SPCA Inspector L. Ntungele confiscated a dog collected from 42 Webner Str., Florida.

ANIMAL DETAILS

Species: Canine

Breed: Mixed breed

Sex: Male

Age: Young

Name: Werkhom

Description: Tan/black/white

Inspectorate number: 195755

EXAMINATION FINDINGS

- **Description** – He presented with a right hindlimb limp. Radiographs were performed and a right femoral mid-diaphyseal complete oblique fracture was seen. He had ticks in both ears, as well as fleas. He had a body condition score of 5 out of 9 according to the Nestlé PURINA Body Condition Score. His deciduous maxillary canines were still present and he had plaque build-up on his teeth. He had a skin condition on his forehead as well as around his right cranial hip area.
- **Prognosis** – Poor.
- **Recommendation** – He was euthanised under the Animal Protection Act as the femoral fracture would have been very painful, and would most likely not have healed by itself.

COMMENTS

The dog exhibited nervous behaviour when handled – behaviour indicative of a dog that has not been handled or socialised in a suitable manner.

In my opinion this animal suffered unnecessarily.

Yours sincerely

Dr Chizelle de Wet (BVSc)
Veterinarian
