Animals groomed on a raised surface with non slip surface.

There is a fan in the clip bay to cool animals down.

There was some hair on the floor and on the surface. They explained that they just finished grooming these animals and the hair will be removed shortly. This appears to be true as there was no hair embedded into the other structures. It also appears as if there were only two dogs' hair on the floor.

Final comments:

Some of the equipment is not broken and won't be harmful towards the animals but they are old and might be a risk in the future. This was brought up with the owner to advise that these might have to be replaced in the near future.

Additionally, I saw another facility in the same centre. This new facility to be added to our database and a pro-active inspection to be carried out when next in this area. The facility is called Perfect Pets.
