

VETERINARY REPORT

To whom it may concern

On Friday, 16 February 2024 at approximately 13h40, I was presented with a rabbit collected from Bacon Belly, Morgan Street, Mitchells Plain.

ANIMAL DETAILS

Species: Rabbit

Sex: Male, intact

Age: Young adult

Description: White Albino, short hair

EXAMINATION FINDINGS

- **Description** – The rabbit presented with a soiled coat and a poor body condition score of 3 out of 9. He had moderate purulent discharge from his left eye which was sunken in, the eyelids had severe conjunctivitis.
- **Prognosis** – Poor
- **Recommendation** – Euthanasia.

COMMENTS

The rabbit exhibited anxious behaviour when handled – behaviour indicative of a rabbit that has not been handled or socialised in a suitable manner.

In my opinion this animal suffered unnecessarily and should have been taken to a vet sooner.

Yours sincerely

Dr Chizelle de Wet (BVSc)
Veterinarian
