Comments by Inspector:

The inspection had been carried out. I introduced myself at the office.

During the pens did have water except for two of them, one sheep and one cattle pen. They had both been filled prior to me leaving the property. They still have one guy, Steve, walking around and refilling water troughs. Additionally, I saw newly equipped water troughs with a ball valve system in two of the cattle pens. This type of system would be implemented in all cattle pens going forward.

One of the sheep was seen to have a slight limp. He was still putting pressure on this leg though. As per SANS ...
