Comments by Inspector:

One dog with a limp. The dog was already seen to by the vet on 01 March 2024. Xrays was taken and the conclusion was to manage pain with Pet Cam and devils claw until the leg can be amputated. The animal is still active and alert, no clear sign of pain and discomfort. She is also not taken for walks. Her name is snowy, she is a female brown and white pitbull type dog. I will follow up with Ciel-Marie as to the next steps regarding Snowy as the staff doesn't know what was discussed between her and the vet.
