Re: Dog Survivor – 900141000126238

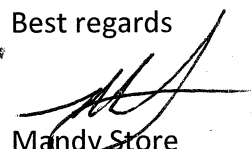

A member of the public – Emily Topping 082 694 2067 rescued Survivor late yesterday afternoon while running in the street at the back end of the storage warehouse in Retreat. Emily brought Survivor to us as a stray. We scanned and found a microchip and contacted the owner. Ms. Rawood said he slipped off his chain and left their premises. I asked the client if we could sterilize him, and she refused to agree to allow us to do that.

Survivor arrived here by us in a poor condition. Full of ticks and fleas and marks on his neck as if he was chained up. He is also exceptionally timid and nervous.

Please can you inspect this property and try and convince this client that we can sterilize Survivor. Ms Rawood agreed that we send Survivor to you as you had initially microchipped him and have all her details.

Can you please send me the case reference details?

Many thanks &
Best regards
