

VETERINARY REPORT

To whom it may concern

On Tuesday, 26 March 2024 at approximately 13h00 SPCA Inspector J. Mfini presented me with a pony collected from 2 Melbourne Rd, Rondebosch.

ANIMAL DETAILS

Species: Equine
Sex: Female, intact
Age: +- 13 years
Name: Staken
Description: Grey

EXAMINATION FINDINGS

- **Description** - Moderately thin body condition score of 4 out of 9 (caloric requirements not met to complete satisfaction). Left mediodorsal part of eye – eyelid was injured in this area. Left ocular discharge. Wounds on medial aspect of right carpus and the lateral aspect of left pectoral area. 3 multifocal areas of scarring just caudal to the mane. Scarring cranioventral to the left hook bone. Shod only on the left front and right hind limbs. Right medial hock presented with a chronic wound.
- **Duration** – Acute and chronic
- **Cause** – Scarring caudal to the mane is usually indicative of a saddle that was not fit properly.
- **Prognosis** – Fair
- **Recommendation** – Shoeing should be redone and placed on all 4 hooves. Open wounds should be shaved and cleaned. She should be fed more often.

Yours sincerely

Dr Chizelle de Wet (BVSc)
Veterinarian
