Warning number	1122																				
Comments by Inspector	I carried out the inspection at this facility. I introduced myself at the office and was granted access. No injured animals was seen during the time of the inspection. All enclosures had water available except for one. It was clear that the animals had just tipped this water container as the enclosure was wet. When I brought this to their attention they immediately filled it up again. One vehicle was seen to not have any ventilation. They come all the way from Hopefield area. I issued the driver a warning (1122) for transportation methods.
