Photos taken Yes Action taken No action required Warning number

Comments by Inspector:

I carried out the inspection. I announced my arrival at the office.

All the animals had access to clean water. There was not a lot of animals due to the rainy weather. However, it didn't rain upon inspection and it wasn't too wet either.

Handling and transportation appears to be better after the last time we intervened. They also cleared out the red pen (used for compromised animals) to prevent further injury.
