Warning Issued No Warning Number N/A Follow-up action \_\_\_\_\_

Which days/times are the best to inspect? In the mornings

Comments by Inspector:

The inspection had been carried out by Thembi and Sivu (AWS). They inspected the four blind goats identified and isolated upon previous inspections. The goats are still being treated, however, ~~the treatment doesn't seem to be working. Another limping sheep was identified and isolated. No~~ clear breaks were seen.

~~The other concerns were related to transportation. The facility provides blindfolds for the animals. The people buying the animals doesn't have proper transportation with sufficient ventilation. These concerns were addressed immediately and rectified prior to them loading the animals.~~

~~No contraventions observed during the time of the inspection.~~
