Scatter feeding on the floor is not advisable

How do staff handle animals Good
In hanging nets / On floor (natural eating position, but not of dirty floor or soil) / Feed rack / Other

Hiding areas Good - Provided.
Good Fair Poor Unacceptable

Environmental enrichment Available
Good (Box/Plastic Container) Fair (not enough) Unacceptable (None) Other

PROTECTION:

Animals not only have to be protected from theft but also from negative human influences such as the teasing and chasing of the animals.

Animal supervision Always under supervision

Interaction between the public and animals must be under strict supervision to ensure the animals are not teased, chased, frightened or abused in any manner.

Enclosure supervision Always under supervision

Adequate supervision must be provided to ensure that animals are not exposed, either deliberately or negligently, to harmful products such as cigarettes, litter, broken glass, potentially harmful foodstuffs or uncontrolled feeding programmes.

Birds of prey Does have sufficient shelter
In areas where birds of prey may pose a threat; sufficient vegetation, such as trees and shrubs, under which the small stock can hide will minimise the threat and offer protection.

Fractious animals No bullying behaviour observed.
Animals must be protected from bullying and aggression from other animals, including those of their own specie. Fractious or aggressive animals must be housed separately or disposed of humanely.

Noise and people No noise made during inspection
Animals must be protected from unacceptable noise levels such as loud music, high-frequency noises and fireworks. All animals should have an appropriate area in which they can retreat to away from direct contact with the public and other animals.

FEED ROOMS

Are the feed room/s clean? Yes

Is roughage stored appropriately? Yes
Messed food swept away daily / no spillage on the floor(s) / unhygienic smell

Ideally under roof and on raised pallets to prevent damp and spoiling (Round bales may be stored outside, if roof and covered)

Are concentrates/mixes stored in clean sealed containers? Yes
Are feed drums labelled? No
Is there a feed board? No Recommended to avoid errors in feeding
Is medication stored separately from feed area? Yes Especially where there are many animal feed boards record what animals should be fed when and what
Record the type of feeds used Lucerne, Oat hay, Pellets, Mielies. Preferable to avoid contamination
Describe pest control? Poison
Describe animals individual diets? N/A Horses need different feeds depending on factors such as age, health, growth stage, work regime
